Thinking different...

illuminate, fascinate, communicate...

We are Visual Edge Limited and this is a sensational new portable light weight illuminated box system used for fabric graphics. The system is called zero® and is suitable for displays, stands and walls.

'zero® allows anyone without any specialist knowledge or skills to be able to transport, build and dismantle illuminated 'Pop-Up' stands easier and quicker while being more competitively priced'

Fabexx™ zero® is a modular, free-standing, double-sided, illuminated profile system made from a robust PVC material which, has been specifically designed for Silicone Edge Graphics (SEG) also known as Tension Fabric Systems (TFS).

Fabexx™ zero® is available in a range of standard sizes so, it's easy to extend your reserve and build multiple configurations and designs to suit different requirements in large or small events.

Fabexx™ zero® - it's so simple, there's nothing to it!

fabric graphic system

Information

The Fabexx™ zerø® is primarily aimed at customers who wish to have the ease of transporting, moving, building and dismantling the frames without the need for any specialist personnel or tools.

Illumination is provided by high intensity Osram LEDs with the added safety benefit of using low voltage 24v DC power.

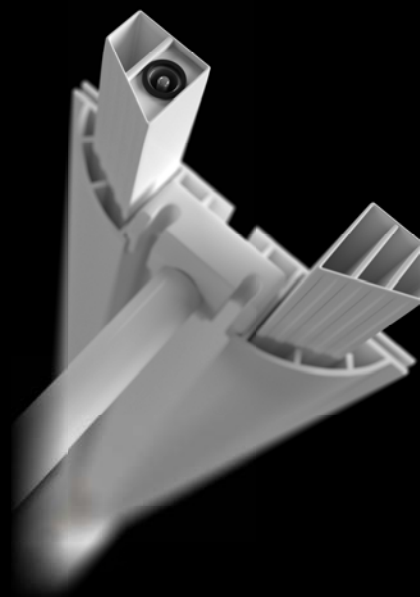

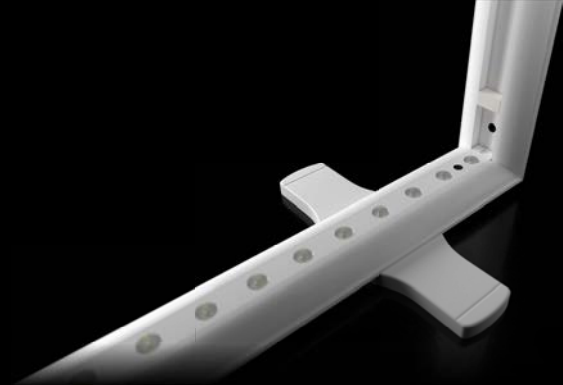

No need to follow any instructions, it's so easy to build, just 'Match & Attach' the graphic symbols on each section of the frame and simply push them together.

Fabexx™ zerø® comes complete with it's own special carrier bag, power converter pack and UK and Ireland 3 Pin plug.

So, if you want your customers to notice a special offer, product or brand, maybe add a bit of sophistication to your company's presentations/events or maybe, you just want to stand out from the crowd!

The new Fabexx™ zerø® is your perfect solution!

'the zerø® system can be built and dismantled so fast, even Usain Bolt would be proud'

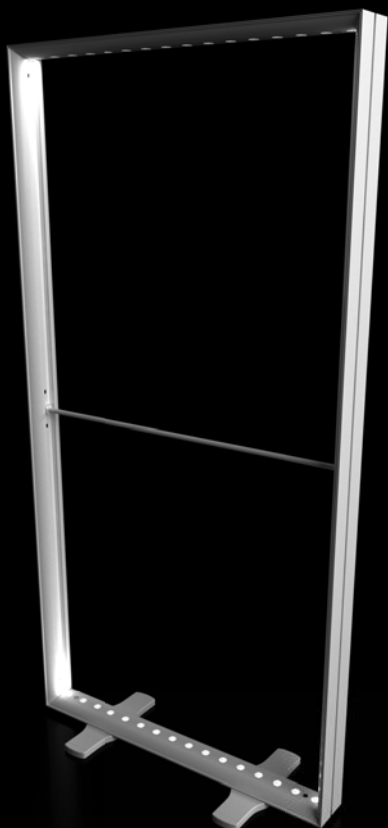

zerø®

Why buy?

"would you like prints with that?"

'We also offer a Dye Sublimation fabric printing service, for those who prefer the complete package.'

There are many reasons why you should buy Fabexx™ zerø® some of these features and benefits are:

Rotating feet (for faster build time)

Double-sided design (for maximum impact)

Detachable feet for greater stability (recommended for the larger sized frames)

Standard channel (for industry standard 14mm silicone keder)

Integrated power connections (no separate internal cabling so, no 'bits' to loose)

'Push & Pull' (simple to build and dismantle so, no tools needed)

'Match & Attach' (simply match the graphic symbols to build in the correct sequence)

Modular design (to allow multiple layout configurations and designs)

Carrier bag (each frame has it's own, for easier packing and protection)

24v DC power pack included (complete with UK and Ireland 3 Pin plug)

Frame Attachments (a range of build accessories available to connect frames together)

Brochure / Leaflet Holder (clear acrylic holder for promotional materials)

Attachement Channel (frame profile has a channel on the outside for fixing connectors)

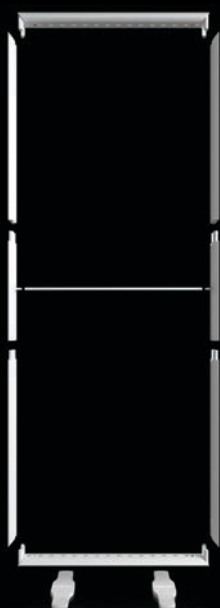

Light weight (easier and more cost effective to transport whether by car, train or plane!)

Robust material (not easy to bend, break or damage during little accidents!)

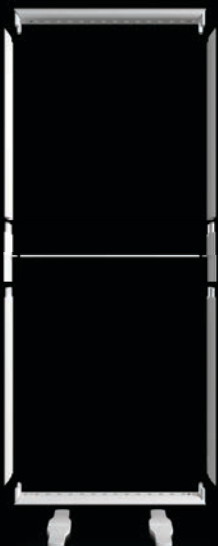

- zerø® experience required
- zerø® knowledge required
- zerø® training required
- zerø® instruction required
- zerø® tools required
- zerø® effort required
- zerø® 'bits' to loose
